

Invisible hazards made visible.

**Download the
app today.**

See the dangers before you start work around powerlines.

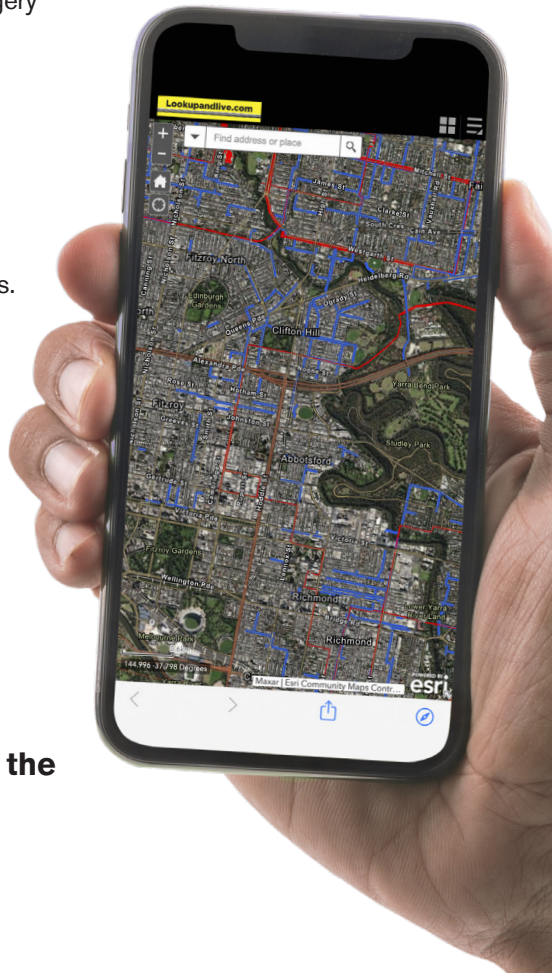

Free and simple to use, the Look Up and Live app helps you safely plan work around powerlines in your area.

Plan ahead and check the app for:

- overhead powerline locations and imagery via an interactive geospatial map
- safety guidelines and advice, including powerline exclusion zones and permits
- information on de-energisation of powerlines
- accessing high load forms
- Before You Dig Australia enquiry details.

If your work or equipment brings you within the powerline exclusion zone, then contact us for a **No Go Zone** assessment. We'll advise on how to stay safe.
