Audit Design and Construction services detailed descriptions

Provision of System Planning Scope

The system planning scope details the Electricity Distributors requirement for the contestable work to be connected to the electrical system. It ensures electrical continuity, system integrity and allows for the long term interests of the general community.

SP1 Single stage of a development

Applies to -:

Single stage of a residential subdivision;

Connection to a single point in the system;

Works which would require the augmentation of a radial electricity line;

Connection of a generator for non export purposes.

SP2 Initial overall development plan submission

Applies to -:

Multi staged developments be it residential or commercial/industrial;

Connection to multiple points in the system;

Works which would require the augmentation of a distribution feeder or a Single Wire Earth Return (SWER) system;

Connection of a generator for export purposes.

SP3 Major Augmentation, quotation on request

Major augmentation includes works which would require the augmentation of multiple distribution feeders, 66kV lines or zone substations.

SP4 Provision of adjacent distribution asset plans

Provision of distribution asset plans in the vicinity of the proposed works in order to facilitate the design. All plans associated with an enquiry will be provided.

Plan Approvals

Plan approval is the ratification of plans submitted by a recognised contractor against the system planning scope and the design and drafting technical standards.

PA1 Single customer overhead/underground

Plan for the connection of a single customer be it via an overhead or underground extension.

PA2 Underground residential development < 10 lots

Any plan submitted for an underground urban residential development with less than 10 lots.

PA3 Underground residential development ≥10 lots

Any plan submitted for an underground urban residential development with 10 or more lots.

PA4 Commercial or Industrial Subdivisions / Multiple Customers / Public Lighting

Any plan submitted for a Commercial or Industrial subdivision, a multiple customer development or a Public Lighting scheme.

PA5 Design/Drafting plan resubmission

Plans resubmitted for design or drafting approval, due to a scope change or non conformance to standards.
